Professional Summary

Final-year B.Tech CSE student with hands-on experience in Python, Java, SQL, and Machine Learning. Developed and deployed 3 end-to-end projects with measurable outcomes including 88a Data Science internship with automated reporting reducing manual effort by 40% Proficient in DSA, OOP, REST APIs, and full-stack development using Flask and MySQL. Seeking entry-level SDE / Data Science roles at product or service-based MNCs .

Technical Skills

- **Languages:** Python, Java, C, JavaScript, SQL, HTML/CSS
- **Frameworks:** Flask, (Spring Boot basics)
- **ML Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib
- **Databases:** MySQL, RDBMS concepts
- **Core CS:** Data Structures And Algorithms, OOP, SDLC, REST APIs
- **Tools:** Git, GitHub, VS Code, Linux
- **Platforms:** Flask (Web), Apache Server

Projects

Local Job Portal

Technologies Used: Python, Flask, SQLite, HTML, CSS

- Designed and developed a role-based web application using Python (Flask), SQLite, HTML, and CSS to connect employers with job seekers.
- Implemented secure user authentication, job posting, location-based search, and online application management with role-based access control.
- Integrated password hashing, session management, and duplicate application prevention to improve security and data integrity.
- Published a research paper based on this project in the International Journal of Advanced Research in Science, Communication and Technology (IJARSCT), April 2026.

House Price Prediction System

Technologies Used: Python, ML, HTML/CSS, Flask

- Built regression ML model with **5,000+ records**, achieving **88% accuracy**.
- Developed Flask-based web interface accessed by **30+ users**, reducing estimation errors by **35%**.
- Applied preprocessing, feature engineering, and validation for optimal performance.
- Visualized outputs with interactive graphs highlighting price trends.

Hostel Management System

Technologies Used: PHP, MySQL, HTML/CSS, Apache Server

- Role-based hostel system handling **100+ student records**.
- Secure login and role-based access for students, watchmen, and wardens.
- Modules for room allocation, complaint tracking, visitor logging; reduced admin workload by **30%**.
- Added automated notifications for complaints and room updates, improving communication.

Internships / Experience

AD Infocom Systems — Data Science Intern

Dec 17, 2024 – Dec 31, 2024

- Contributed to data preprocessing, predictive modeling, and automated reporting during a focused Data Science engagement at AD Infocom Systems.
- Processed **1,000+ real-world records** for model training.
- Developed and tested ML models achieving **85%+ accuracy**.
- Automated reporting scripts, reducing manual effort by **40%**.

Certifications

- **Generative AI Literacy** – FutureSkills Prime (NASSCOM), 2026
- **Introduction to Machine Learning** — NPTEL (2024)
- **HackerRank Skills Verification – Python (Basic)** — HackerRank (2026)
- **Python for Everybody** — Coursera (2024)

Education

Tulshiram Gaikwad Patil College

Sep 2023 – Jul 2026

B.Tech in Computer Science Engineering - 7.92 CGPA, Nagpur, Maharashtra

SMDR Government Polytechnic

Jan 2020 – Jun 2023

Diploma in Computer Science Engineering – 70%, Dhule, Maharashtra

Maharashtra State Board

Jul 2020

SSC (10th) – 91.40%, Navapur, Maharashtra
